

Kete ID – Feedback and Engagement Survey

Kia ora and thank you for taking the time to share your experience.

This short form is part of a research and design project exploring how we can improve safety and communication for people living with dementia in Canterbury and beyond.

Your insights will help shape the development of **Kete ID** – a simple wristband with a QR / NFC tag that can securely store emergency details, care preferences, and key contacts.

Responses are confidential and anonymous. Please answer as honestly as possible. There are no right or wrong answers – only your experience.

Section 1: Participant Context

A few quick details to understand your background and role in dementia care.

1. Name (Optional)

2. Role

Mark only one oval.

- ☐ Family Caregiver
- ☐ Nurse/Support Worker
- ☐ Facility Manager
- ☐ Dementia NGO staff
- ☐ Doctor/Nurse
- ☐ Other:

3. Location

4. How long have you been involved in dementia care?

Section 2: Current Practices

We'd love to understand what systems or tools you currently use to keep people with dementia safe and supported.

5. Does any person you know with dementia have a medical ID/tracker?

Mark only one oval.

- ☐ None
- ☐ MedicAlert
- ☐ GPS tracker
- ☐ Other:

6. If so, how effective is it in real situations?

Mark only one oval.

	1	2	3	4	5	
Inef	☐	☐	☐	☐	☐	Very effective

7. What works well and what doesn't for the current ID/tracker available? *If no experience, what would your thoughts be on this?*

Section 3: Pain Points

This section explores what happens when things go wrong — misunderstandings, wandering, or unnecessary hospital transfers.

8. What are your biggest safety or communication challenges?

9. Have you ever had to call emergency services or search for a person with dementia?

Mark only one oval.

☐ Yes

☐ No

☐ Other:

10. How often do misunderstandings or unnecessary hospital trips occur?

Mark only one oval.

- ☐ Never
- ☐ Rarely
- ☐ Sometimes
- ☐ Often
- ☐ Very Often

Section 4: Proposed Solution Feedback

We're testing an idea for a **Kete ID wristband** – a simple wearable with a QR or NFC tag that, when scanned, links to a secure online profile.

The profile could show information such as emergency contacts, GP details, key medical conditions, or care preferences.

11. Initial thoughts?

Mark only one oval.

- ☐ Love it
- ☐ Sounds useful
- ☐ Unsure
- ☐ Not necessary
- ☐ Concerning

12. Any privacy or consent concerns?

For e.g. usability of bracelets in people with dementia may be difficult as they might see it as foreign.

13. What information should responders see when they scan it?

14. Ease of keeping info up to date?

Mark only one oval.

1 2 3 4 5

Hard ☐ ☐ ☐ ☐ ☐ Easy

15. Would you use or recommend it?

Mark only one oval.

- ☐ Definitely
- ☐ Probably
- ☐ Maybe
- ☐ Unlikely
- ☐ No

16. Can we contact you when we start a local pilot?

Mark only one oval.

- ☐ Yes
- ☐ No

Section 5: Follow-Up

If you're open to being part of a future pilot study or follow-up discussion, please share your contact details below.

17. Best contact method

18. Who else should we talk to?
