

ScriptPal User Feedback

ScriptPal is a free app built by a NZ doctor to help patients track medications, understand them in plain language, and bring a clear summary to appointments. I'd love your honest feedback – good or bad.

PLEASE NOTE: ScriptPal is still in early development. Please use made-up/dummy information (fake name, fake medications) rather than your real details while testing – this helps us protect your privacy while we're still building out full security features.
